

PROGRAMMA
SEMINARI 2024/25

**12:30, Aula A4-Dipartimento di Scienze del Farmaco, L.go Donegani 2,
Novara ed in diretta streaming**

Valorisation of peptides obtained From Natural Sources

4 Marzo Cláudia Botelho (Universidade do Porto; CECA - ICETA)
Host: Prof. Bordiga

Molecular aspects of cellular senescence in mesenchymal stem cells (MSCs) an their impact on differentiation

19 Marzo Prof. Roberto Narcisi (Erasmus MC - Rotterdam)
Host: Prof.ssa Bosetti

Targeting brain metastasis through the protumoral microenvironment

21 Marzo Neibla Priego (Spanish National Cancer Research Centre, Spagna)
Host: Prof.ssa Grolla

Elucidating the mechanics and structure of whole mitotic chromosomes

26 Marzo Gijs Jn.L. Wuite, Vrije Universiteit Amsterdam, The Netherlands
Host: Prof. Miggiano

Exploring Chirality in Natural Products: Insights into Cannabinoid Stereochemistry

15 Aprile Giulia Mazzocanti (Università Sapienza)
Host: Prof. Caprioglio

Molecular regulators of neurodegeneration and neuroinflammation in ALS: unveiling a new therapeutic target for the disease

5 Maggio Prof. Silvia Pozzi (Université Laval, Canada)
Host: Dott.ssa Tapella

Corylus avellana non-specific lipid-transfer protein Cor a 8 is a moonlighting enzyme with a new lipase activity

7 Maggio Prof. Salvatore Adinolfi (Università degli Studi di Torino)
Host: Prof. Miggiano

Addressing stereochemical challenges in organic synthesis through metal- and biocatalysis

14 Maggio Daniele Fiorito (Politecnico di Milano-PoliMi)
Host: Prof. Caprioglio

The role of cholesterol in neurodegenerative diseases: a possible therapeutic strategy

28 Maggio Alice Passoni (Istituto di Ricerche Farmacologiche "Mario Negri")
Host: Prof. Aprile
